

Your Contribution to Sustainability

To help reduce our environmental impact and preserve natural resources, we have adopted a number of sustainable practices that allow us to combine environmental responsibility with the highest standards of comfort and hospitality.

- Towels: Towels are replaced every three days as part of our standard housekeeping service. If you would like fresh towels sooner, please leave the used towels on the bathroom floor.
- Bed linen: Bed linen is changed every three days, unless you request otherwise.
- Smart air conditioning: Our air conditioning system is equipped with window sensors that automatically switch the system off whenever a window is opened, helping to reduce unnecessary energy consumption.
- Energy saving: We kindly ask you to switch off the lights and any electrical appliances when leaving your room.
- We kindly ask you to turn off the water when it is not in use in order to avoid unnecessary waste.
- Waste separation: Your contribution is greatly appreciated. In the Municipality of Salò, waste should be separated as follows:
 - Organic waste: Please dispose of it only in biodegradable bags.
 - Plastic: Please place plastic waste in the designated recycling bin, separate from other waste.
 - Paper and cardboard: Please dispose of them separately.
 - Glass and cans: Please dispose of glass bottles, jars and metal cans together in the designated recycling container.
- Silence is part of the experience: please help us preserve the peace and quiet of the hotel, especially during the night.

Thank you for supporting our commitment to sustainability. Together, through small everyday actions, we can help protect the environment and preserve the beauty of our local area for future generations.
